

JEFFREY VALERIANO CASTILLO NÚÑEZ

Senior Frontend Engineer | [React](#) · [TypeScript](#) · [Next.js](#)

Remote (Chihuahua, México) | jeffvaleriano@gmail.com | +52 614-569-6186 | [linkedin.com/in/jeffreyvaleriano](https://www.linkedin.com/in/jeffreyvaleriano) | Open to remote / international contract roles

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 7+ years shipping production React and TypeScript applications for fintech, energy, and SaaS clients on distributed remote teams. Specializes in Next.js, performance optimization, and design system architecture, with hands-on backend experience in Java (Spring Boot) and Node.js for end-to-end feature delivery. Native Spanish speaker, fluent in English (C1).

TECHNICAL SKILLS

Core Frontend: React 18, TypeScript, Next.js 14 (App Router, SSR), JavaScript (ES6+), Redux Toolkit, React Query, HTML5/CSS3, Tailwind CSS, CSS-in-JS

Backend & APIs: Java (Spring Boot), Node.js (Express, NestJS), GraphQL, REST APIs, WebSockets, SignalR

Testing & Accessibility: Jest, React Testing Library, WCAG 2.1

Cloud & DevOps: GitHub Actions CI/CD, Docker, AWS, Azure

Databases: PostgreSQL, MongoDB

Also Familiar With: Cypress, GraphQL subscriptions, Microsoft Power Platform (Canvas Apps, Dataverse, Power Automate, Dynamics 365 F&O)

Languages: Spanish (Native), English (C1 — Advanced)

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — [Enroute Systems](#) Sep 2025 – Present

Remote · Client engagement: Key Energy Services

- Architected React 18 + TypeScript enterprise dashboards with Redux Toolkit and React Query, sustaining sub-200ms response times for 1,000+ concurrent users.
- Built and maintained Java (Spring Boot) REST APIs powering core business logic and third-party integrations for energy operations.
- Led frontend technical direction and mentored 3 junior developers on component architecture, state management, and code review standards.
- Delivered an Assets Audit Report System on Microsoft Power Platform (Canvas Apps, Dataverse, Power Automate, Dynamics 365 F&O) as sole developer across 8 project phases.
- Introduced AI-assisted workflows for scoped task generation and validation, reducing review turnaround while maintaining test coverage standards.

Senior Frontend Engineer — [Tenco](#) Jan 2025 – Aug 2025

Remote

- Engineered React 18 + TypeScript dashboards with Redux Toolkit, adding real-time updates via SignalR and WebSockets for enterprise clients.
- Built Java (Spring Boot) and Node.js backend services with structured error handling for downstream API integrations.
- Applied AI-assisted validation tooling to repetitive QA workflows, reducing review turnaround time.

Frontend Engineer & Project Lead — [Pescadata](#) Feb 2024 – Dec 2024

Remote

- Architected Next.js 14 applications using App Router and server-side rendering, improving Core Web Vitals and SEO performance by 40%.
- Built Java (Spring Boot) backend services alongside Next.js API routes for server-side data fetching and business logic.
- Reduced deployment time from 2 hours to 15 minutes by parallelizing GitHub Actions CI/CD pipelines.

Frontend Engineer — [Excelia](#) Sep 2023 – Jan 2024

Remote

- Built a high-performance React + TypeScript SPA, reaching 98% test coverage with Jest and React Testing Library.
- Developed a reusable CSS-in-JS component library with WCAG 2.1 compliance; cut bundle size 35% through code splitting and tree shaking.

Frontend Developer — [Mi Credivale](#) Dec 2022 – Aug 2023

Chihuahua, México

- Built React and GraphQL applications processing 5,000+ daily financial transactions with 99.9% uptime.
- Developed Node.js/Express.js services for data aggregation and payment microservice integrations, including multi-step validated form workflows with optimistic UI.

Frontend Developer — [Avvio Solar](#) Aug 2021 – Nov 2022

Remote

- Built interactive solar energy dashboards with real-time visualizations (React, Chart.js, D3.js) for 200+ commercial clients.
- Built Express.js REST APIs with JWT authentication and Stripe integration; cut initial load time 45% through lazy loading and asset optimization.

Freelance Frontend Engineer — [Upwork](#) Aug 2018 – Present

Remote · Ongoing part-time practice alongside full-time roles above

- Delivered 20+ React/TypeScript SPA projects for fintech, e-commerce, and SaaS clients.
- Built Node.js APIs (Express, NestJS) with testing and accessibility compliance for select client engagements.

EDUCATION

Bachelor's Degree in Software Engineering — Universidad Autónoma de Chihuahua (UACH), 2022
Chihuahua, México
